

The **Naval & Maritime Consortium (NMC)** is an active network of member companies, community partners, and OEMs that collectively addresses challenges, shares solutions, and collaborate to develop opportunities within the growing Blue Tech industrial sector.

Our programs and goals focus on Naval submarine shipbuilding and offshore wind supply chains within and around New England.

NMC MISSION:

The Naval & Maritime Consortium (NMC) is bolstering the naval and maritime business base within New England. Our network maximizes collaborative and teaming opportunities in Blue Tech to support the following objectives:

- Effectively catalog capabilities of members and offer greater visibility and exposure to regional and industrial consumers.
- Develop a coordinated ecosystem of integrated manufacturers and suppliers in the Blue Tech industrial sector.
- Leverage our world-class network to provide access to valuable information and programs related to workforce development, Industry 4.0 technology transfer in production and quality systems, cybersecurity, growth financing, and regulatory standards and compliance.
